COMMUNIQUE

WOLF OF WALLSTREET

On the 21 February 2019, the Racing Stewards, in collaboration with the GRA, ordered the collection of a number of non raceday urine samples.

On the 05 March 2019 QuantiLAB, the MTC approved laboratory, reported that 16beta-hydroxystanozolol was detected in the urine sample taken from Wolf Of Wallstreet.

Trainer Mr. S. Jones was advised of this detection and under MTC Rule 200 (2) (b) decided to exercise his right to have the "B" sample despatched to Laboratoire des Courses Hippiques (LCH), Paris for analysis.

The Stewards are awaiting the results of the counter analysis.
